Summary

A certified software quality assurance tester with three years of work experience focusing on manual testing, automation testing (website and mobile application) and Software Testing training facilitation using a Solution Focus Approach. Pursued a Bachelor's degree in Electronics and Communication Systems Engineering. Skilled in problem-solving, critical thinking, management and tech training. Possess a great passion for design, implementation, and evaluation of systems software technologies for social change. Eager to employ my skills for this cause.

Experience

QA Software Tester at Muraho Technology

November 2018 – January 2022

- Analysing software requirements and Identifying testable features,
- Preparing test plan and test strategies for a successful manual and automation testing,
- Designing test cases for all levels of testing (Unit, Integration, System and Acceptance testing), and for all test types (Functional testing and non-functional testing)
- Executing test cases manually and Performing automation testing with any of the tools listed on the left side under the "Automation Testing Tools" section,
- Setting up a test strategy that leads to successful API testing and Performing continuous testing in continuous integration,
- Performing client-side and server-side performance testing (Load and Stress Testing),
- Preparing test progress reports and final reports,
- Managing test cases, bugs and testing in general using Google Spreadsheet, Kanban board(trello.com), Jira and Documenting using Jira and Confluence.
