## SPRAY THE GERMS AWAY!

Instead of Sodium Hypochlorite use Silver peroxide or multi combination disinfectants for powerful Virucidal action.

Because **Covid 19** is strong enveloped virus and need to destroy it's GENOME completely with Silver metal Peroxide formulations - Silvicide or Quaternary Ammonium Compound based Combination products such as Havisan, Havisan Extra, Havisan special or Totasep for effective results. Sodium hypochlorite is only act on surface of the virus and can't penetrate into the virus very well. An ideal Disinfectant damage the cell wall, bind the protein and coagulation. Finally denature the nucleocid, DNA and RNA by coagulation of proteous matter and inactive. Virucidal activity will be occurred. Nothing beyond science and technology.
